

AIR HOURS

Powered by Nextel™

Tear Up Your Timesheets!

Application Overview

AirHours™ is an easy-to-use, productivity tool that eliminates paper timesheets for field personnel in construction and other service related industries. Exchange information between any Nextel™ "plus" phone and AirHours' website (www.airhours.com) using Nextel Online wireless Internet service. Its simple, enter information one time and avoid redundant administrative expenses.

Features

- 24/7 collection of timesheet and project information
- Enables field and office personnel to instantly share time-critical, company information
- Allows employee hours to be assigned to specific projects, phases and/or cost codes
- Captures information in digital formats, which can then be imported directly into other software applications such as spreadsheets, databases, accounting and payroll services
- Produces timesheet reports that can be viewed directly on the phone, or sent via fax or email

Benefits

- Replaces paper timesheets for field-based employees and mobile professionals
- Reduces time spent by field managers on non-productive, administrative tasks
- Eliminates redundant, manual entry of field data, saving time and expense in the office
- Provides management with real-time job cost information critical to making informed business decisions
- No new hardware or software required

Enter data ONE TIME

AirHours eliminates the redundant, manual entry of timesheet and project information. Instead of transcribing handwritten or verbal timesheet information into spreadsheets or accounting software, AirHours allows data to be entered one time, by the employee in the field. Once captured, information can then be imported directly into financial spreadsheets, software applications and even submitted electronically to payroll services.

Avoid the weekly fire drill

The collection of timesheet information from field personnel typically results in a weekly "fire drill" with employees rushing to fill out and submit manual timesheets in time to meet an accounting deadline. AirHours simplifies the entire timesheet process by allowing managers to use their Nextel mobile phone to collect employee timesheet information anytime, 24/7. Collected information is stored in a secure account database, which can be instantly accessed via a web-enabled wireless phone or a PC.

Do it all on the phone

AirHours is "phone-centric", relying on an intuitive, easy-to-use phone interface. Enter hours and project information using the phone's keypad. Nextel Online service includes unlimited data via the phone and it's always on, so there's no delay in accessing service. It is also possible to switch between online services and voice calls at anytime or use both at the same time.

AIRPUT
Mobilizing Operations
www.Airput.com
Email: info@airput.com

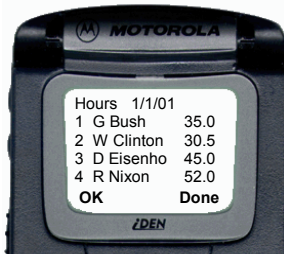

Nextel Communications and Airput, Inc. are working together to provide the AirHours wireless timesheet and cost tracking service. AirHours is available on all Nextel *plus* phones and all charges related to the AirHours service will be conveniently included on your Nextel bill. To subscribe to AirHours, just call your local Nextel sales representative.

Make your phone work overtime!

The mobile phone has become an irreplaceable tool. Now Airput allows it to perform double duty as a field-data collection tool. AirHours meets the needs of construction and service companies by working to mobilize and optimize their field operations.

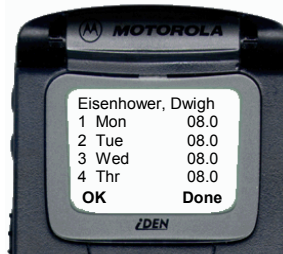

Airput your timesheet information!

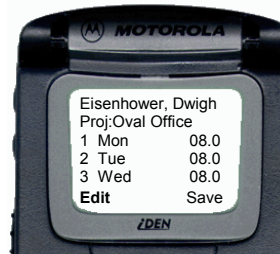

Set up Employee and Project Lists

Enter employee names and projects ONE TIME via the AirHours.com website. Each account can have an unlimited number of employees and phones sharing the same information.

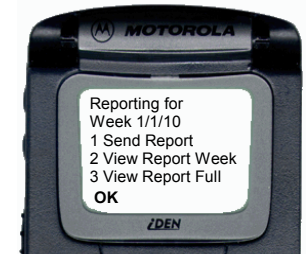

Enter Hours Using the Phone

Select an employee and enter hours for any day of the week. Timesheet data is saved digitally in a secure account database, which can be accessed via phone or a PC.

Assign Hours to Projects, Phases and Cost Codes

Employee hours can be tied to a project or phase of a project. Project timesheet information is saved and can be reviewed for job cost analysis and new job bidding.

View and Send Timesheet Reports

Timesheet information is summarized in spreadsheet reports that can be viewed on the phone or sent directly from the phone to any fax or email address.

Generate Timesheet Reports - View customized weekly timesheet reports on the AirHours website. Reports can be customized to have information displayed by workweek, by day, by employee, or by project. Reports can also be viewed on the phone and can be faxed or emailed from the phone, or the website.

Presidential Builders - Weekly Summary Report - Week of 5/1/00

Employee	Mon	Tue	Wed	Thr	Fri	Sat	Sun	Total
Bush, George	8	9	0	8	10	0	0	35
